

Bank transformation speed requires accurate and understandable monitoring.

Solutions for Finance 3.1 is the dynamic dashboarding management tool designed for banking executives that meets the industry's challenges.

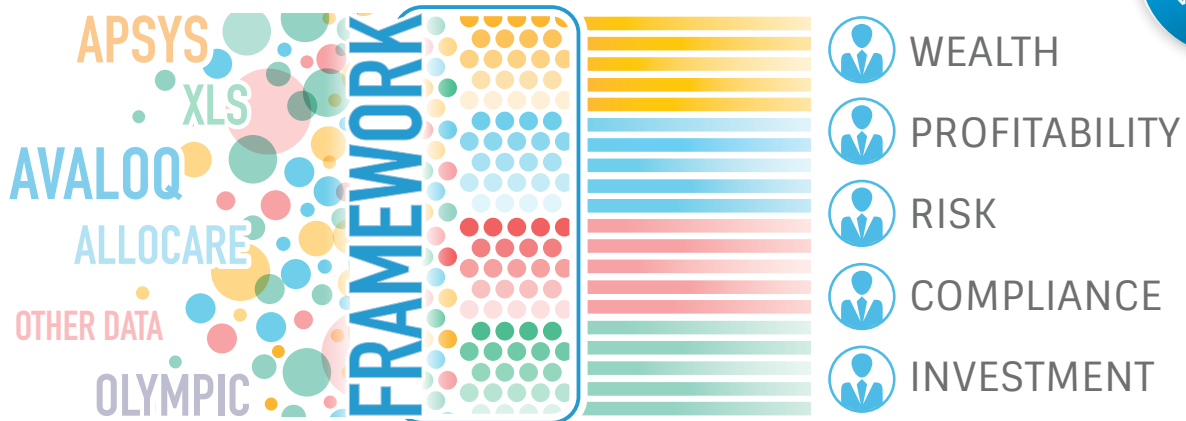

Managers need to know if the business transformation launched meet customer's challenges and the internal strategy of the business line. They need immediate answers to their questions, without soliciting internal services that can only provide the required information after a certain period of time and cost. They need an interactive and easy-to-use solution rather than a static report. Executives do not want to use complex banking platforms to collect the relevant figures themselves, as accessing the necessary information is difficult and time-consuming.

Solutions For Finance Data Processing Map

2018
NEW
VERSION
3.1

This suite processes the data executives need, regardless of its source (back-office, front-office, CRM, ad-hoc solution, etc.). Solutions for Finance 3.1 is already integrated with the most common banking platforms and can process numerous other sources.

An innovative IT solution which allows managers to monitor the profitability of various activities at any time.

A synthetic view focused on essential information is vital when managing transformation processes of financial institutions.

Version 3.1 dramatically improves the data management processes and the dynamic visualization of results. It also meets the end-user-experience best practices to give managers a clear and immediate view of the situation. A single figure alone is useless: it is the context that needs to be adapted to the user's situation.

Milestones

July 2009	Company founded, 2 Swiss-holders
January 2013	Solutions for Finance launched
May 2015	5 active financial institutions
October 2017	10 active financial institutions

« Today, transparency at all levels is required, representing Solutions for Finance 3.1's ambition, and implying that we must be able to value these services in order to make them profitable. »

Cédric Aeberli, CEO of Integraal Solutions

You need something simple and easy to use.

While Solutions for Finance 3.1 is mainly used by private banks, it may also be suitable for independent managers, family offices, and financial companies. The goal is the same: in-depth control of the management information system and devoting a maximum of resources to doing what is needed to be recognized, both vis-à-vis big banks and international competition. Personalized service offered to customers, expertise that makes a difference.
